

Superstores Sales Dashboard

I'm happy to share my focus on leveraging data analysis, especially time series techniques, to drive valuable insights and accurate sales forecasting.

Here's a breakdown of the key components: -

1. **Dashboard Creation:** Design intuitive, visually appealing dashboards with  interactive visualizations and filtering options, allowing users to explore data at various levels of granularity. This includes identifying  KPIs critical to business goals.
2. **Data Analysis:** Utilize data to provide business entities with  actionable insights on sales strategies, helping them understand what's working and where there's room for improvement through engaging visualizations.
3. **Sales Forecasting:** Analyze historical data and apply time series models to  predict sales for the next 15 days, enabling data-driven decision-making for optimized sales strategies.
4. **Actionable Insights & Recommendations:** The end goal is to deliver meaningful insights that support strategic decision-making, fostering growth , efficiency , and customer satisfaction .
